Web Implementation

Credibility through restraint.

IntelAgent resolves the tension between speed and rigor. Our visual system is designed to reassure Mexican university marketing directors that they possess a robust, methodological research tool—delivered with contemporary SaaS warmth.

**Contemporary
Softness**

We've evolved past brutalist

corporate aesthetics. By introducing rounded corners (`rounded-2xl`) and softer borders (`border-gray-200`), the interface feels human, approachable, and modern without sacrificing its authoritative core.

Editorial Typographic Hierarchy

Scale contrast remains crucial. Use massive display type with tightly-tracked spacing paired with highly structured, highly legible body copy. This mimics the rigor of an academic research report while maintaining digital agility.

Visual Trust Signals

We visually encode three things: Private deployment (not public models), source-cited outputs (no AI hallucinations), and the methodological heritage of Berumen. Our expanded palette uses subtle data-driven accents to enforce this premium narrative.
